Conservative bound; FY2026 through April

$502,210

Downtown restroom service cuts

FY2026 adopted · Civic hours and Gaslamp closure

The Independent Budget Analyst identified short-lived contacts following clearings as the likely explanation for poor Caltrans outreach outcomes. The dedicated $620,917 program cut was adopted; outreach was planned to continue through other contracts.

THE DECISION

Move suitable police duties to civilian staff. Fund sustained outreach, accessible restrooms and property protection. Credit only verified reductions in paid police work.

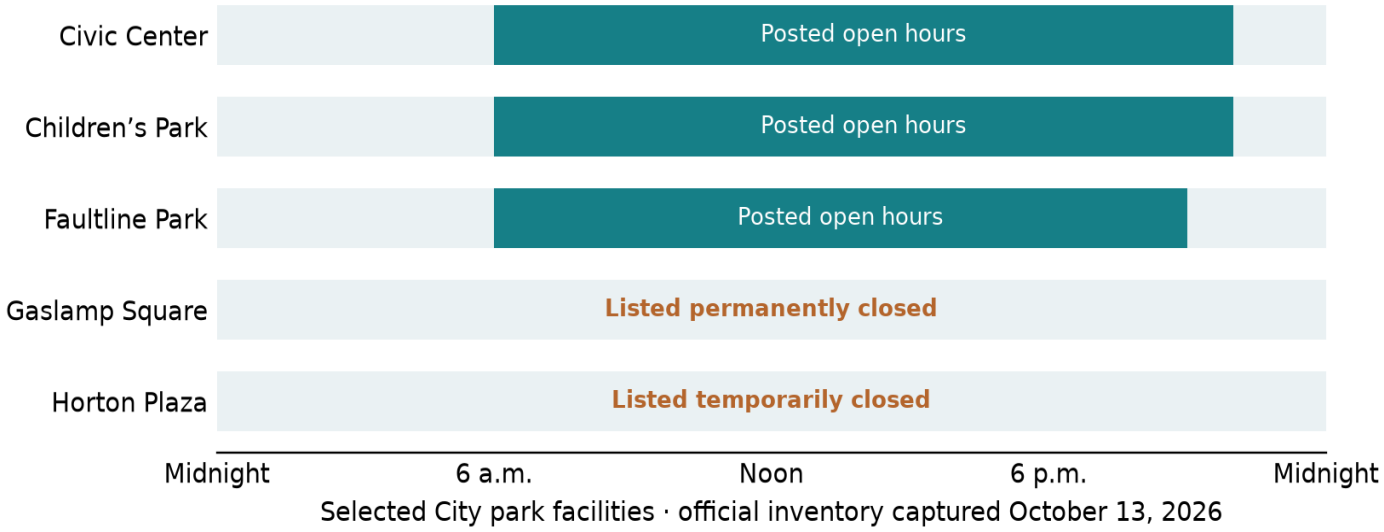

Action now	Evidence supporting the action
Restore verified overnight restroom access	The City acknowledged inadequate round-the-clock access, then adopted cuts to Civic hours and Gaslamp service
Move service governance and suitable duties	Police HOT receives 52.3% of reported FY2027 outreach funding. Oceanside approved a $130,000 civilian-governance transfer. $75.4 M of grant-funded homelessness payments are absent from the published actuals; the City's meal contractor billed $3.48 M against a $3 M Council-approval cap.
Enforce documented service commitments	Require completion evidence and remedies for breached commitments and confirmed property losses. 143 of 149 shelter safety forms were filed after a records request; Travelodge: "no issues" vs an SDFD wiring citation. FY2026 safe-sleeping invoices: $111,030 claimed in no released invoice.

CDMA05; CDMA06; CALB01; O46; RP11; RP12; FPB02; P18; BK05; O13; NR64027654; OD-ACTUALS; NR69291725; NR51908316; NR53761990; NR71540521; NR37828979; NR55184143; NR64091015; NR64091016. 98.3% is an official reported assessment, not a causal estimate. CSIP does not cover all shelter routes. The breach concerns site improvements; the court rejected systemic OVO enforcement breach.

Downtown lost restroom service after a warning

City findings, adopted operating reductions and the current posted schedule establish a basic service problem.

Public record	Documented decision
Final City response / 2023	Agreed that downtown round-the-clock access was inadequate and there was no single comprehensive siting plan. No analysis of the costs caused by insufficient restrooms had been done.
Adopted FY2026 operating cuts	Civic Center: 24 → 16 hours daily, –$244,567. Gaslamp Square closure: –$257,643. Total: –$502,210.
Portable-restroom funding	FY2026 added $750,000 in one-time downtown funding. The revised FY2027 IBA report identifies its $750,000 removal in the adopted reduction package.

These selected park facilities exclude shelter, library, MTS and Port toilets. Posted hours are not independently observed access; a hidden old Civic 24-hour record was excluded.

County health guidance identifies inadequate toilets and handwashing as increasing fecal-oral disease risk. Its final 2021 shigella count was 53 homeless people affected, 36 hospitalized. The historical countywide outbreak illustrates risk; no facility-specific causal estimate was measured.

Fund verified overnight access. Compare staffed restroom costs with cleaning and enforcement costs, including the burden of 113 historical downtown citations.
