3,645+

No accommodated CSIP referral

Conservative bound; FY2026 through April

$502,210

Downtown restroom service cuts

FY2026 adopted · Civic hours and Gaslamp closure

The Independent Budget Analyst identified short-lived contacts following clearings as the likely explanation for poor Caltrans outreach outcomes. The dedicated $620,917 program cut was adopted; outreach was planned to continue through other contracts.

THE DECISION

Move suitable police duties to civilian staff. Fund sustained outreach, accessible restrooms and property protection. Credit only verified reductions in paid police work.

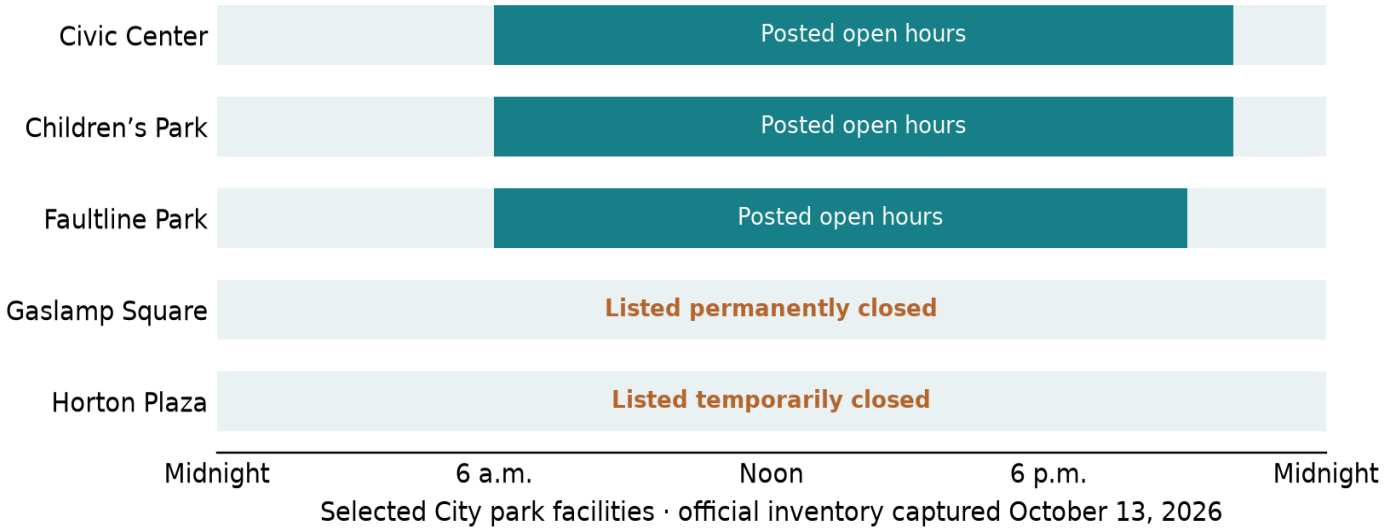

Action now	Evidence supporting the action
Restore verified overnight restroom access	The City acknowledged inadequate round-the-clock access, then adopted cuts to Civic hours and Gaslamp service
Move service governance and suitable duties	Police HOT receives 52.3% of reported FY2027 outreach funding. Oceanside approved a $130,000 civilian-governance transfer. $75.4 M of grant-funded homelessness payments are absent from the published actuals; the City's meal contractor billed $3.48 M against a $3 M Council-approval cap.
Enforce documented service commitments	Require completion evidence and remedies for breached commitments and confirmed property losses. 143 of 149 shelter safety forms were filed after a records request; Travelodge: "no issues" vs an SDFD wiring citation. FY2026 safe-sleeping invoices: $111,030 claimed in no released invoice.

CDMA05; CDMA06; CALB01; O46; RP11; RP12; FPB02; P18; BK05; O13; NR64027654; OD-ACTUALS; NR69291725; NR51908316; NR53761990; NR71540521; NR37828979; NR55184143; NR64091015; NR64091016. 98.3% is an official reported assessment, not a causal estimate. CSIP does not cover all shelter routes. The breach concerns site improvements; the court rejected systemic OVO enforcement breach.

Downtown lost restroom service after a warning

City findings, adopted operating reductions and the current posted schedule establish a basic service problem.

Public record	Documented decision
Final City response / 2023	Agreed that downtown round-the-clock access was inadequate and there was no single comprehensive siting plan. No analysis of the costs caused by insufficient restrooms had been done.
Adopted FY2026 operating cuts	Civic Center: 24 → 16 hours daily, –$244,567. Gaslamp Square closure: –$257,643. Total: –$502,210.
Portable-restroom funding	FY2026 added $750,000 in one-time downtown funding. The revised FY2027 IBA report identifies its $750,000 removal in the adopted reduction package.

These selected park facilities exclude shelter, library, MTS and Port toilets. Posted hours are not independently observed access; a hidden old Civic 24-hour record was excluded.

County health guidance identifies inadequate toilets and handwashing as increasing fecal-oral disease risk. Its final 2021 shigella count was 53 homeless people affected, 36 hospitalized. The historical countywide outbreak illustrates risk; no facility-specific causal estimate was measured.

Fund verified overnight access. Compare staffed restroom costs with cleaning and enforcement costs, including the burden of 113 historical downtown citations.

RP11; RP12; RP14; RP01; CALB01; FPB02; RHO05; RHO07; RHO08. Response PDF2/4; Parks PDF9; HSSD PDF5; health report PDF1–2. Inventory Oct 13, 2026: objects 336/308/94/96/111. Citations PDF9: July 2020–July 2022, not homeless-only or proven no-access cases. Historical outbreak, no current outbreak claim.

The City identified a damaging service model

Primary contracts and budget records establish what was known, when it changed, and what remains unmeasured.

Date	Documented record
October 2021	City Net contract began. It required monthly outcome reporting but did not set quantitative outcome targets.
Mid-2023	Housing-exit targets were listed as “Reporting Only”; staff sought a baseline.
2024 / 2025 review	HSSD reported 98.3% remained homeless. IBA identified interrupted relationship-building as the likely explanation.
FY2026 adopted budget	Dedicated program funding fell $620,917. HSSD said state right-of-way outreach would be integrated into remaining contracts.

THE MECHANISM IDENTIFIED BY THE IBA

Following the clearing schedule → short-lived or sporadic contact → limited continuity and trust → poor reported housing outcomes.

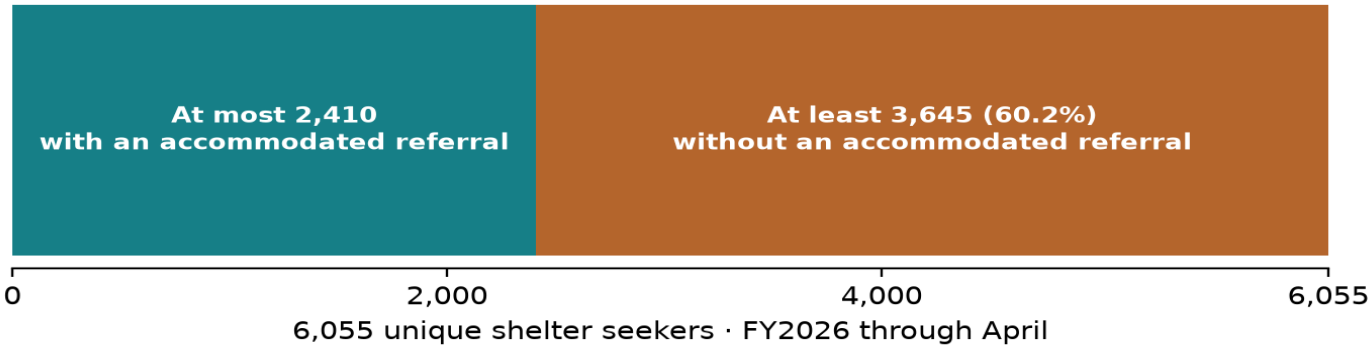

This is a direct local explanation linking the arrangement of outreach to poor results. The published records do not provide the cohort size, observation window, numerator or follow-up definition needed to reproduce the 98.3% figure or isolate a causal effect.

The adopted correction is acknowledged. Whether the replacement model delivers sustained housing and reduces recurrence still requires matched program costs and outcomes.

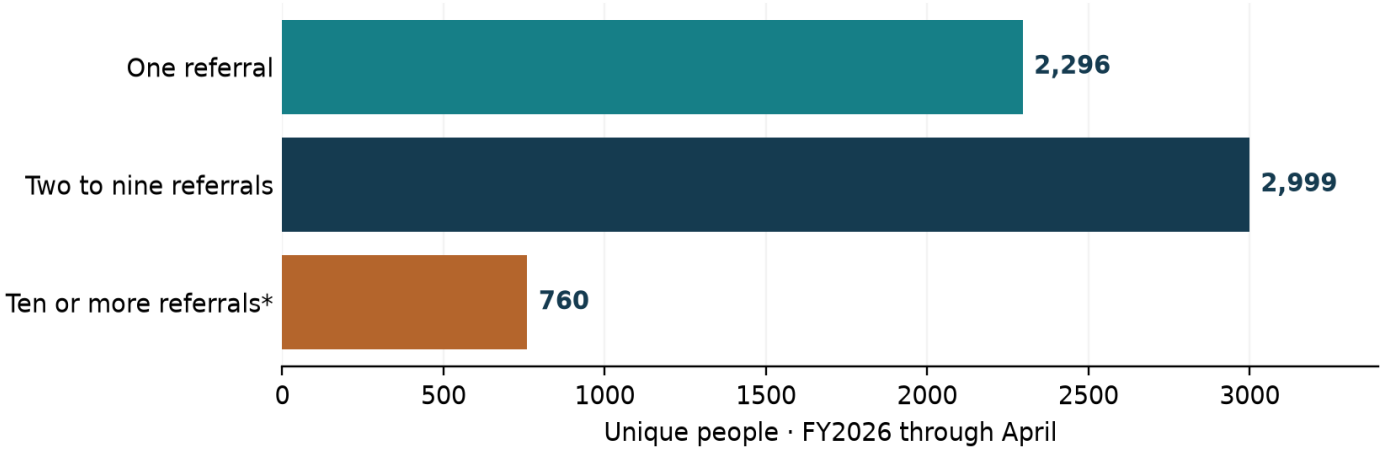

CDMA05; CDMA06; CDMA07; CDMA08; CALB01; CALB05. IBA PDF180/printed 176; staff response PDF1; original contract PDF6; 2023 contract PDF17–18; adopted budget PDF6. Reporting requirements existed before numeric targets.

People asked repeatedly for shelter

SDHC's May 8, 2026 minutes distinguish 6,055 unique people from 28,526 referral attempts.

Even if every one of the 2,410 accommodated referrals belonged to a different person, at least 3,645 people had no accommodated CSIP referral: 6,055 − 2,410 = 3,645, or 60.2%.

*760 is the remainder derived from the two published counts; the source rounds that group to 13%. At least 3,759 people were referred more than once.

This measures a constrained intake route. It does not mean those people never obtained shelter elsewhere, and it does not link them to particular abatements.

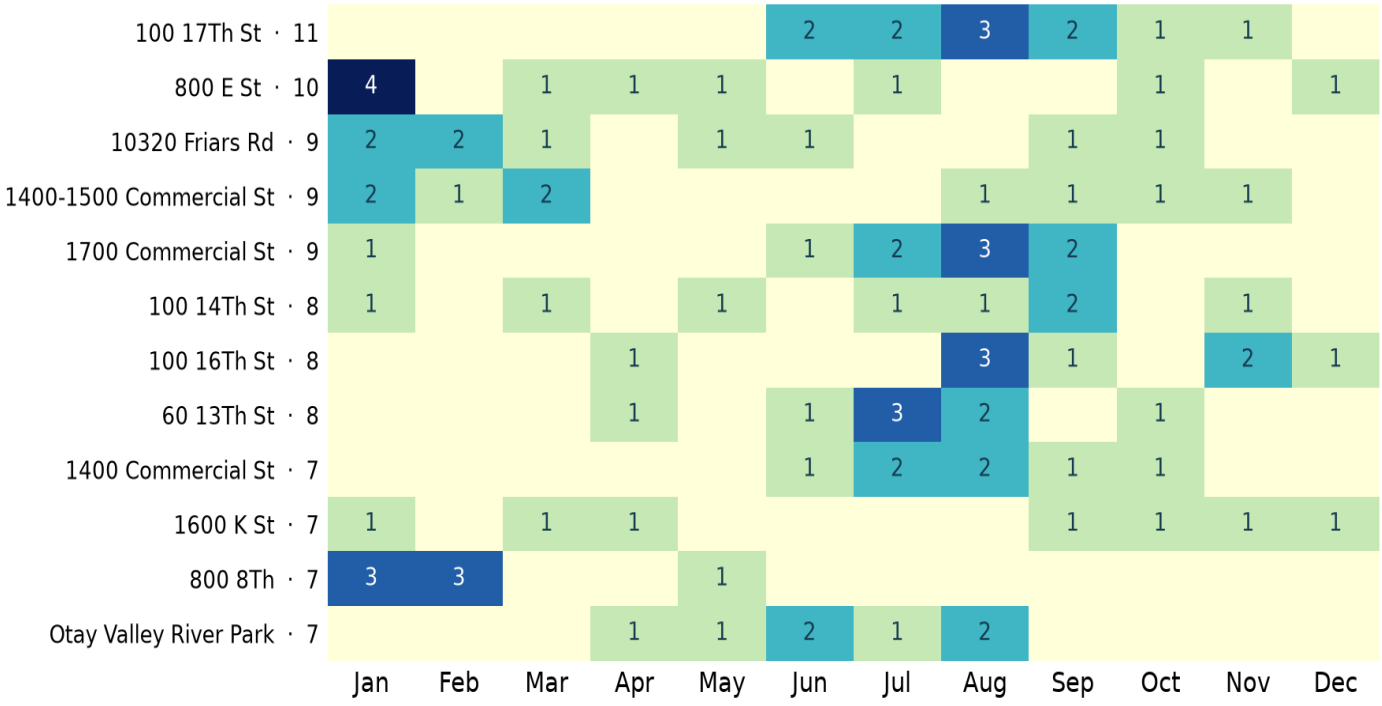

O46. PDF3–4, FY2026 year-to-date through April as reported May 8. Accommodated referrals are not a unique-person count or independently confirmed shelter arrivals.

Recurring clearance needs an outcome test

Current City-attributed reporting is separated from independently reproducible historical records.

ATTRIBUTED REPORTING · DISTINCT LOCATIONS AND PERIODS

City-attributed reporting: 67 sweeps near 19th/Imperial, July 2025–March 2026. Union-Tribune analysis, republished by Governing: at least 107 near K/16th in 2025. Completed-operation source data were not independently reproduced.

The historical heatmap now counts positive recorded abatements on explicit DATE ABATED values. Across 3383 dated rows, 929 have positive counts; 872 have usable addresses and 2021 abatement dates, yielding 800 distinct address/date pairs.

100 17th Street appears on 11 distinct dates. These are recorded abatements at supplied locations, not unique people, displacement events or failed housing placements.

CDMA10; K16 P01; NR53089233. 67/107 are separately attributed reports, not independently reproduced operation counts; modern K/16th release records case-closure times. Historical PDF101–168:12 most recurrent exact addresses; 57 positive rows excluded; no fuzzy matching or inferred dates.

A breached commitment is established

The May 6, 2026 federal order provides direct evidence of City noncompliance with promised Safe Parking improvements.

Court record	What it establishes
Mission Valley improvements	The court found breach 18 months after settlement approval and ordered a budgeted plan and schedule.
$900,000 improvement budget	Promised work included water/electricity hookups, lighting, bathroom/shower connections and other improvements; the court rejected the City's substantial-compliance argument.
Enforcement allegation	The court rejected systemic breach involving Oversized Vehicle Ordinance enforcement; it found H Barracks reasonably available.
2024 settlement obligations	$2,950,000 fees/costs + $135,000 damages + $52,500 service awards = $3,137,500, plus up to $25,000 monitoring. Actual payment is not reconciled here.

ACCOUNTABILITY DOES NOT END WITH A LATER FIX

Publish completion records and responsibility for the earlier failure. Assess historical harm and remedies separately from the status of current corrective work.

The 2024 fiscal obligations preceded the 2026 breach finding. They must not be described as a penalty caused by that later breach or as all attributable to property destruction.

P18; P12. May 2026 order PDF7–10;2024 final approval PDF6,16–18. Site-improvement breach is not a finding that SDPD violated storage rules. Later compliance status was not established in the acquired order.

Property losses require case findings

The expanded record supplies historical evidence, specific duties and a concrete storage lifecycle—not an aggregate violation rate.

Evidence	Supported conclusion
2009 operation /2010 grand jury	Official findings described destroyed personal property and blocked retrieval; the City disputed key notice and retrieval findings.
Isaiah complaint and settlement	The complaint links nonprofit-purchased, labeled carts to alleged destruction. Settlement established procedures and contains no admission.
2022 witnessed reporting	inewsource documented disputed notice/sorting incidents; the City acknowledged correcting a separate wrong-day notice.
July–November 2023 matched case	Photos and case 4317343's log support collection, storage and disposal 143 days later. This demonstrates preservation before later disposal.
Historical short intervals	65/72/74/79-day entries remain audit candidates. Date-specific rule, custody, actual disposition and notice are unresolved.

Current code checks · effective July 29, 2023

Required procedure	Operation-linked evidence
24-hour ordinary notice	Posting and start times; documented grounds for any expedited three-hour notice.
Owner retrieval / bag inspection	Opportunity to remove belongings; photographs of opened-container contents.
Eligible items / ≥90 days	Item inventory, storage and disposal dates; dated eligibility and exception records.
Before / during / after record	Original site and process photographs or video. Missing production is an evidence gap.

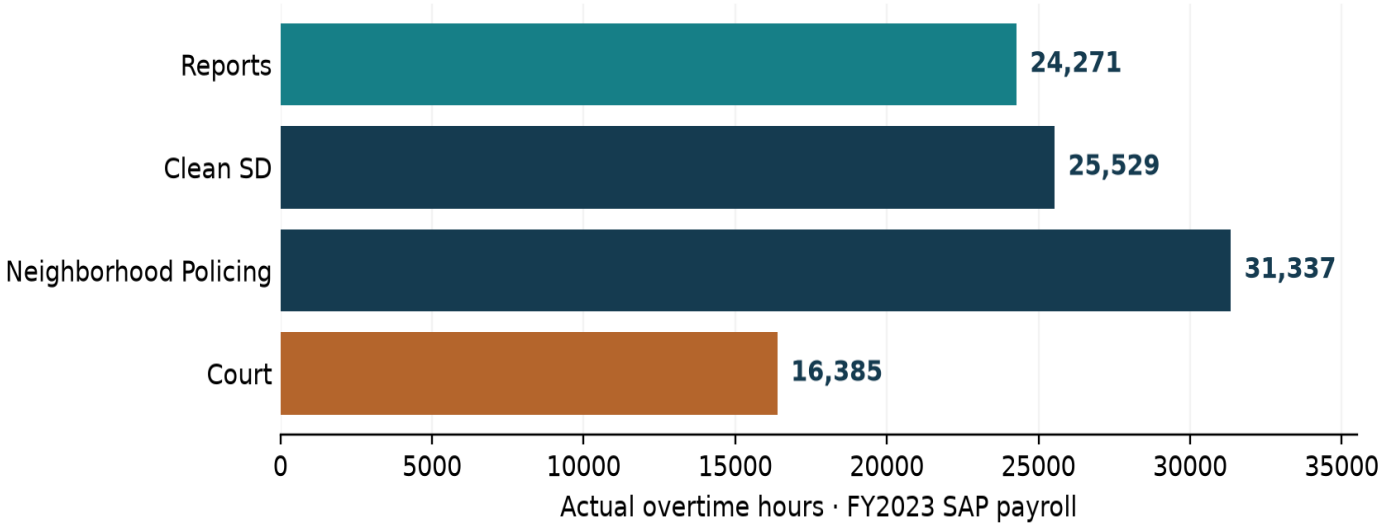

The July 10, 2023 photo/log match predates this code. It is inferred from date and items without a photo case ID; applicable earlier rules need separate review. No donor origin or retrieval attempt was located.

6,228 abatements, 29 impounds and one retrieval remain a serious question for inventories and access records. Different units and an unknown eligible-property denominator prevent treating them as a violation rate.

P14; P15; P07; P08; P16; NR26333671; NR36242342; E03; FP01. Grand jury PDF9–10 paired with City response PDF4–5; complaint¶10/46; settlement no-admission clauses; July 2023 log PDF2. Newer 27 dated disposals all≥92 days and implemented 2026 storage corrections remain material.

Start with paid work that can be identified

SAP payroll supplies task-level overtime hours; the current task mix and eligible replacement share still need measurement.

Reports overtime is a more specific review target than assuming complaint-desk time will cancel Clean SD crew coverage. The March 2025 order defines it as unplanned report completion beyond a normal 10-hour shift.

Candidate	Cash condition
Eligible report preparation	A civilian-qualified portion of actual paid report work ends; sworn investigative judgments remain assigned appropriately.
Facilities/fleet administration	Confirm the identified filled officer assignment still exists, define separable duties and remove funded salary without backfill.
Disclosure /court coordination	Separate administrative preparation from protected decisions and required testimony; cancel qualifying paid hours.

The categories have no published General Fund filter or item-level task mix. FY2023 hours are a measured historical baseline, not money already available for FY2027.

BK05; BK06; BK38; BK37. Overtime audit PDF27/printed 22; Reports order PDF2–3/internal order 11003715; IBA unit profiles; current POA court/shift rules. Redeployment alone releases time, not cash.

A civilian transfer can move an appropriation

Oceanside supplies an approved local precedent; San Diego must price a net replacement rather than another staffing addition.

POLICE COMMUNITY SERVICES

$130,000

→

CIVILIAN HOMELESS SERVICES

$130,000

Approved FY2026–27 transfer for two existing outreach social workers. Together with $130,000 Measure X funding, the contract totals $260,000 annually. This changes oversight and appropriation; net savings or mature housing outcomes are not demonstrated.

San Diego planning basis	Annual amount / limitation
Existing 6-person model	$631,327 recurring, including wage/fringe proxy and operations; maximum modeled GID-only OT offset still leaves $37,849 unfunded.
Department compensation benchmark	5 Office Support Specialists × $100,302 +1 Associate Analyst × $158,185 = $659,695 compensation alone; different dated cost basis.
Same operating allowance added	$689,695 with the prior $30,000 operating assumption; neither estimate establishes FY2027 marginal costs or cancelable payroll.

The October 2025 SDPD study priced added capacity and predicted no overtime reduction. It did not test deleting specified paid administrative assignments. A net-conversion study must answer that different question.

O13; O14; O06; O07; O15; BK22; BK23. Oceanside council approvals May 20/Aug 19, 2026; class estimates PDF10. Original FY2027 wage-plus-proxy model and October 2025 agency estimates retain distinct dates. Fixed pension liabilities are not a savings credit.

The contractor invoices now reconcile

All 12 FY2025 Urban Corps monthly bills match the City's $3,289,993.10 schedule.

Billed component	FY2025 amount
Labor	$2,640,260.00
Vehicles	$383,298.00
Mileage	$113,091.00
Disposal	$153,344.10
TOTAL	$3,289,993.10

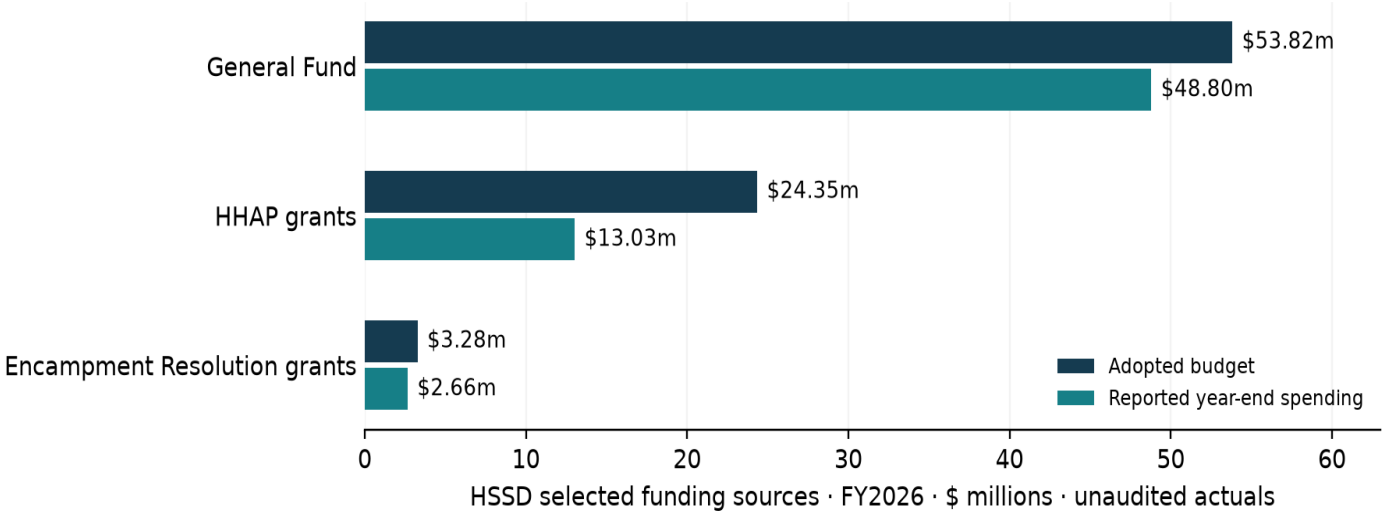

Same-month service comparison	May 2024	May 2025
Crew-member hours	4,985	6,032
Supervisor hours	1,592	1,848
Hourly billing rates	Crew $30 /supervisor $40	Crew $30 /supervisor $40
Invoice total	$269,930	$303,586

The higher May bill accompanies more billed hours at unchanged rates. These invoices cover proactive downtown work, regional crews and NPD support. They cannot price every abatement or establish an inefficient police assignment.

BNR56369076; BK41. Annual ledger reproduces all monthly financial sums. Selected month-hours reconcile; an unreconciled November rate × hours row prevents claiming a reconciled annual-hours total. Bills and reported City costs are not bank-payment proof; work is already civilian.

Service cuts need a reconciled funding record

Follow the same program from adopted funding to payments and outcomes; grant variances do not establish available cash.

HHAP: $24,350,665 adopted versus $13,031,014 spent in FY2026, a reported $11,319,651 variance. This is a lead for grant-round reconciliation, not an unrestricted balance or proof that funds were deliberately withheld.

Reported strategy allocation	FY2026	FY2027
Shelters	$38.8 m	$35.8 m
Safe parking	$4.4 m	$3.8 m
Outreach (FY2027 Police HOT share: 52.3%)	$10.5 m	$9.9 m
Prevention and diversion	$13.1 m	$17.7 m

The revised IBA report confirms adopted service reductions, including downtown restrooms. Most of the overall funding decline reflects completed one-time Homekey acquisitions; prevention funding increased. Publish obligations, payment timing, restrictions and carryforward commitments before treating any variance as reusable funding.

BK08; FPB02; FPB03. HSSD PDF57; revised IBA PDF4/7/9. HOT $5,163,800 / reported outreach $9,869,000: allocation share, not removable savings. Strategy figures are rounded City/SDHC budgets. IBA prose/fund-total differences are retained in the ledger; no grant-specific housing-effect claim.

Aid and preservation have documented costs

Tax returns and grant completion records replace a replacement-price benchmark with reported expenses.

Primary financial record	What the amount means
Think Dignity /CY2024 **$52,485**	Reported Program Supplies expenses; $48,311 program services and $4,174 administration. No itemized tent/sleeping-bag count.
Think Dignity /CY2024 **$199,574**	Transitional Storage Center expense; 400 bins/lockers. This program cost overlaps supply spending and must not be summed with it.
Think Dignity /CY2024 **$191,338**	ID Bank expense, including records access and preservation. An operating cost, not the value of documents confiscated.
Shoreline /CY2025 **$87,715**	Reported cash assistance for housing, supplies, transport and essentials to 519 reported recipients; the goods-only portion is unavailable.
Rotary grant /2024–25 **$1,000**	Reported donation to Shoreline for a sleeping-supply project; 15 beneficiaries. Vendor receipts were not accessible.

The Isaiah complaint provides a historical pleaded donor-to-loss connection: at least nine nonprofit-purchased carts allegedly destroyed. It is disputed and unpriced. No current same-item chain establishes an actual aid-waste total.

RS07; RS10; RS03; RS06; P07; P08. Form 990 physical PDF3/11;Shoreline Schedule IPDF36;grant final report. These are different periods and overlapping cost categories. Safe Sleeping site purchases do not prove street distribution or later confiscation.

Housing continuity is a testable alternative

The strongest case combines local program evidence with appropriately bounded external research.

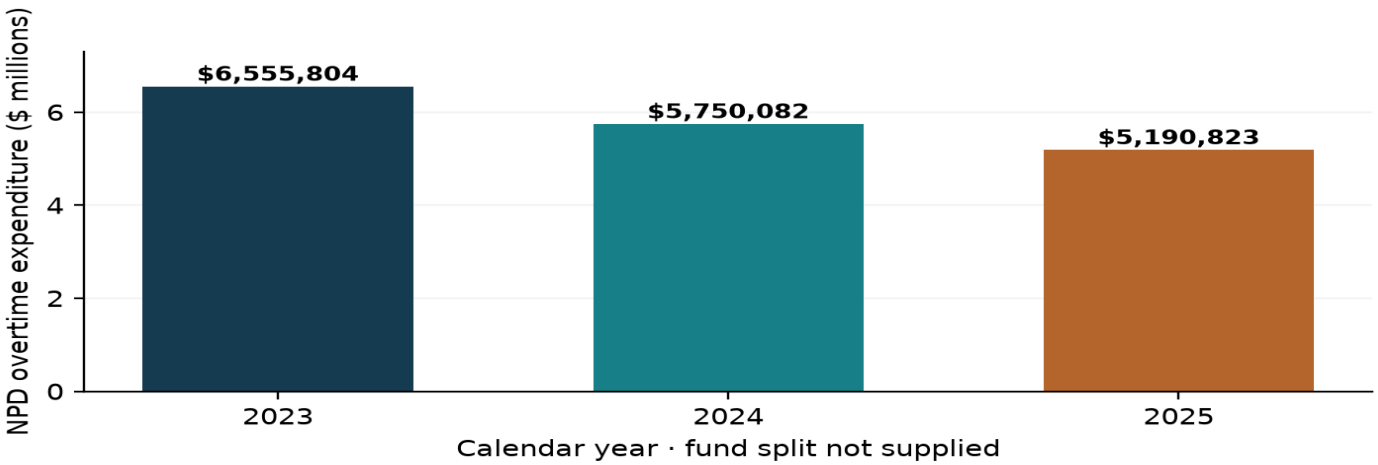

Evidence design	Finding / practical limit
San Diego official assessment	The Caltrans outreach model interrupted relationships. Locally operating ERF projects pause routine enforcement during focused outreach and rental assistance; no matched causal comparison.
Local provider case account	Think Dignity describes an encroachment conviction blocking professional-license renewal, followed by employment/housing after expungement assistance. Independent case records were not acquired.
Vancouver prospective cohort	Confiscation associated with lower housing-exit hazard: adjusted 0.35, 95%CI0.13–0.94. Nonrandom 235-person drug-using cohort; no San Diego effect size.
Denver randomized housing evaluation	Supportive housing reduced justice/emergency demand; offsets covered 44–57%of intervention costs. Cost avoidance across governments is not automatically removable police payroll.
Regional measured outreach exits	RTFH reported 53%successful exits in FY2025, including temporary/institutional destinations. This is neither 53%of all clients permanently housed nor comparable to CSIP attempt completion.

A local comparison should measure sustained housing, recurrence, property loss, emergency-service use and actual spending for comparable participants. Contacts and closed complaint rows alone cannot answer those questions.

CDMA05; S01; RS05; O20; O22; O25. OCA2026 PDF46–47;provider PDF16;Vancouverstudy Table 2;Denvercost Tables 7–10;RTFHPDF15. External observational and modeled results are corroboration, not a City causal estimate.

Due diligence bounds the funding claim

The proposed change must survive actual expenditure, service and compliance records.

Material record	Implication
Police GF actual FY2026:$699,569,129	Unaudited actuals were $3,946,349 below original adopted $703,515,478. Current total overspending is not established.
NPD overtime fell 20.82%in CY2023–25	Agency-reported reductions already occurred; do not credit them again as new funding. Fund split and task attribution are unavailable.
OT safeguards remain past due	June 30, 2026 follow-up lists recommendations 1.1–1.3 past due, target December 2026, while recording partial improvements.
Property corrections implemented	Annual item-policy review and translated notices are verified. The 2023 matched lifecycle and newer≥92-day entries demonstrate preservation in reviewed cases.
Civilian response already exists	Coordinated outreach began in 2020; adopted FY2027 ESD adds two civilian Code Compliance Officers. Suitable transfers require specific tasks and staffing, not a claim that all work is now sworn.

State Auditor: funding disclosure and provider reviews are marked implemented. Safety/public-health outcome measurement is marked “Will Not Implement”; its latest published City response is April 2025. The August 2026 unresolved-recommendation list still records two open San Diego items.

BK08; BK19 P; BK36; BK42; O04; FOUT01; FOUT02; FOUT09. FY2026 actuals PDF36/46;NPDslides PDF10;follow-up PDF132–134,219–220;ESDbudget PDF7. The $707.253 m comparator is a third-quarter projection, not a revised appropriation. Entirepolicebudget causal harm and net transfer savings remain unproved.

Turn the evidence into enforceable decisions

A bounded set of records and funding conditions can resolve the remaining questions.

Decision owner	Required public product
City Council /Police /IBA	Net-conversion schedule: current paid Reports/fleet/disclosure/court duties, eligible civilian hours, funded post/OT deletion, replacement cost and backfill controls.
City Council /HSSD /SDHC	Linked anonymized outcomes: actual operation dates, prior/outreach contacts, completed shelter/housing entries, 90/180-day retention and recurrence. Reuse existing systems and contract reporting.
City Council /Parks /County	Verified overnight restroom and handwashing access, named operators, posted-hours checks and a full cost comparison including cleaning and enforcement.
City Council /HSSD /State Auditor	Effectiveness measures for City safety/public-health programs; distinguish contacts and cleaned blocks from hazards reduced, sustained access and housing retention.
City Council /independent review	Stratified property-case audit with applicable dated policy, custody, notice, condition, inventory, disposal authority and retrieval attempts; publish remedies for confirmed loss.
Governor /Caltrans /City	Executed 2026 renewal and all amendments; invoice/payment reconciliation; pre-clearing outreach and housing continuity; property records and after-action reports.
Providers /City auditors	Item-level aid-loss sample linking purchase or donation, distribution, seizure and disposition. Price only matched losses; separate lawful unclaimed disposal.

BUDGET RULE

Credit only expenditure that actually ends. Evaluate the replacement by service continuity, housing retention, safety and protected belongings.

O04; S01; CDMA01; BK06; BK23; FOUT02; FOUT10.2020 outcome-tracking recommendation was ultimately not fully implemented; 2026 auditor cautioned against a separate duplicative process. No new public-records requests or external contacts were submitted during this research.

Evidence and unresolved questions

Specific service redesign and spending controls are supported; the required proof for broader claims is identified.

Question	Established evidence / remaining limit
How can the response impede housing?	City/IBA assessment links clearing-following outreach to interrupted trust and 98.3% remaining homeless. Agency interpretation, not a controlled causal effect.
How many shelter seekers were served?	6,055 unique people enable a conservative 60.2% bound and repeated-request distribution. No link to particular sweeps.
Where do actual abatements recur?	A verified 2021 DATE ABATED/count subset supplies 800 address/date pairs; current 67-clearing reporting is separately attributed.
Which property failures are established?	Official disputed findings, specific duties and matched 143-day preservation improve case analysis. Current systematic violation rate remains unproved.
Which spending can end?	Actual Reports overtime and reconciled invoices improve baselines. Current eligible payroll cancellation and marginal replacement costs remain unavailable.
How much supplied aid was destroyed?	Primary reported financial expenses and a historical pleaded donor link are preserved. No proven current aid-waste dollar total.
Is basic sanitation available?	The City acknowledged inadequate round-the-clock access, then adopted downtown service cuts. Current posted schedules show overnight gaps; actual field access needs verification.

Research combines the existing Downloads index with new official budgets, contracts, audits, court records, provider filings, public portals, local reporting and primary studies. The accompanying ledger distinguishes measurements, allegations, agency explanations and models.

Public-source discovery is not access to every record. Document pages use verified 25-row pagination; inaccessible originals, missing current terms, excluded irrelevant matches and negative searches are retained in the coverage ledger.

What the released records add

Payment ledgers, inspection forms and open data released by the City, joined to the report's claims (update of October 16, 2026).

Record	What it establishes
HHAP annual report to the State (through Dec 31, 2025) vs the City's own payment extract	Round totals agree: HHAP 3 $26.87 M expended, HHAP 4 $21.75 M, HHAP 5 $13.13 M of $23.88 M obligated (55%). The grant ids in the ledger map to rounds by this agreement.
Published operating actuals vs the payment extract	The open-data actuals carry no grant-fund rows for any department; $75.4 M of HSSD vendor payments FY2022–FY2025 ran through state and federal grant funds and are visible only in released records. The actuals still end at FY2023.
149 HSSD JHAT monthly shelter safety forms (request 25-7306, filed Sept 19, 2025)	143 were submitted Sept 23–26, 2025 for inspection months from Feb 2024 to Aug 2025 (median lag 246 days); six were contemporaneous. All 143 by one HSSD submitter.
Travelodge family shelter, Aug–Sept 2025	JHAT form dated Aug 12, 2025 (HSSD, SDFD, provider attending): no electrical issues. SDFD annual inspection Sept 3, 2025: extension cords in lieu of permanent wiring, 0 of 1 repaired. The JHAT form was submitted Sept 26, 2025.
Released Safe Sleeping contracts	Providers' financial statements blacked out in full: DSDP copy 77 of 171 pages; Dreams for Change copy 12 of 129 ("Appendix B: Financial Audit"). Measured by page render (mean gray 0.4 vs 248–255 on adjacent pages).
Non-competitive Dreams for Change agreement (20th & B)	Exhibit C lists the required Contractor Standards pledge, insurance, W-9 and 501(c)(3) forms with none attached; Exhibit D is a blank "LICENSE USE TERM FOR XXX FACILITY" template.

IN ONE SENTENCE

Shelter safety inspection forms for 2024–2025 were submitted in a batch four to seven days after a records request, and the Travelodge form reports no electrical issues against a Fire Department wiring citation three weeks later.

Each item is a verified original (page rendered) or a reproduced measurement (script and inputs preserved under analysis/mining). Inferences from timing or absence are stated as such: the inspection series may have been transcribed into a new form platform in September 2025, which would still mean the released series is a 2025 transcription rather than contemporaneous records. No private individual is identified.

NR69291725; NR64027654; OD-ACTUALS; MINE-OUT; NR51908316; NR53761990; NR34425046; NR34425047; NR35389114. HHAP report PDF43; extract parsed to 1,445 lines ($149.85 M); JHAT page 1 of each form; SDFD notice PDF1 and 3; contract pages 71–148 and 115–127; agreement PDF38–40. Alternative explanations are retained in the ledger.

Closure is not resolution

The City's closure instruction and its open data measure recurrence after encampment clearings; the sites' reported exits are priced against what the City pays.

Measure	Finding
Get It Done closure instruction (NPD auto-reply, 2022)	"Close your report if the homeless outreach need or encampment has been resolved or the encampment has moved." Relocation counts as resolution for reporter closure.
Encampment reports closed 2023–Oct 2026 (open data)	210,047 closures. Excluding City-flagged duplicates, a closure was followed by a new report at the same address within 30 days in 27.5% (2023), 36.1% (2024), 33.9% (2025) and 31.1% (2026); within 90 days 39–48%. District 3: 42.1%.
Interval to the next report at the same address	Median 32 days (2023) → 18 (2024) → 16 (2025) → 8 (2026). 3,117 addresses with ten or more reports carry half of all reports.
FY2025 safe sleeping sites: payments vs HUD APR outcomes	Persons served 566 / 867 / 483 (DSDP O Lot, Df C O Lot, 20th & B); permanent-housing exits 47 / 72 / 40, i.e. 8.3% of persons served at every site; operator payments $1.99 M / $2.40 M / $1.40 M: $42,385, $33,325 and $35,071 per permanent exit, before City-paid site costs.
FY2025 safe parking lots (JFS): payments vs HUD APR outcomes	1,117 persons served, 262 exits to permanent housing (23.5% of persons served; 32.8% of leavers); about $2.61 M paid: $2,340 per person served and $9,980 per permanent exit. A different population (households with vehicles), but the same public denominators.
Fire-Rescue "Likely Homeless Fires" dataset	6,836 incidents 2018–July 2025; 1,240 in 2022, 1,173 in 2024; January–July 2025: 887 against 604 a year earlier (+47%). ZIP 92101 leads with 1,063.
City-paid site infrastructure (FY2026–27 purchase orders)	Tents (590 ordered Aug 2026 at $365; 455 at O Lot, 135 at 20th & B), portable showers at $7,542 and $7,214 per unit-month, meals at $4.61 and $5.64, laundry trailers, portable restrooms ($1.64 M), on-site security. Operator contracts are 75–85% of a site's cost.

IN ONE SENTENCE

A third of encampment reports closed in 2024–2026 were followed by another report at the same address within 30 days, and the median interval fell from 32 days to 8; the City's own instruction counts a moved encampment as resolved.

Reports are resident complaints at an address, not counts of people; an address can host different situations and 2026 is a partial year. APR figures are agency HMIS reports whose arithmetic was verified, not independently audited; most permanent exits were subsidized placements (PSH 9, 45 and 22), which depend on placement supply rather than site programming.

NR14947981; OD-GID; NR57670544; NR57670542; NR57670541; NR57670449; NR57670447; NR48704373; NR71540521; MINE-OUT. Auto-reply PDF216; open-data files hashed in analysis/mining/inputs; APR Q5 PDF2 and Q23 c PDF29–30 of each report; PO extract 138,005 lines. Cost per exit is not a measure of program quality.

Contract caps, amendments and withheld statements

Executed agreements, Council resolutions and the payment ledger read together.

Record	Finding
Dreams for Change, 20th & B (initial term to June 30, 2024; $944,927 cap)	Paid exactly $944,927.00 on PO 4000192949 by May 22, 2024 (nine lines; the last a capped partial payment). Council approved a First Amendment adding $487,791 for the initial term (R-315452, Apr 11, 2024; executed Apr 24, 2024); no payment for April–June 2024 services and no draw on the increase appears through June 30, 2025. The resolution recital prints $478,791; the executed amendment says $487,791. The City's own PO list for the vendor as of Sept 4, 2024 shows the $944,927 PO and no purchase order for the increase.
JFS Safe Parking, Third Amendment	The recital raises the cap to $2,828,070; the operative compensation clause says $2,878,070 per option period. FY2025 safe-parking payments (about $2.62 M) sit under both.
HSSD purchase order 4000266578 (Sept 24, 2025)	Built to $49,999.99: twelve "Temp Power Extension" at $3,710.55 plus $5,473.39 preventive maintenance. Citywide, 636 of 40,182 POs fall within 4% below a round threshold; HSSD has six.
City leases dataset (updated Oct 16, 2026)	1801 Logan Ave (Travelodge) leased from HERO LLC for "HOMELESS HOUSING" with no rent recorded; 116 S 20th St storage center at $16,106.80 a month, sublet to the operator at no recorded rent; priced homelessness rows explain about $259 k of $2.21 M FY2023 HSSD rent expense.
City meal contractor (Rowe Solutions, RFP 10090047-24-O)	Bid $4.50/$5.50 a meal, $1.46 M a year estimated; "shall not exceed $3,000,000 without City Council approval." The 23 released invoices (Dec 2023–Sept 2025) total $3,476,603; the July 2025 invoice took the total past $3 M. No Council action is in the corpus. A further $2,761,536 purchase order followed on Feb 19, 2026.
Public records routing	Of 1,045 homelessness-subject requests in the portal index (2021–2026), the share listed to the City Attorney rose from 1–5% (2021–2024) to 17% in 2025 and 15% in 2026.

IN ONE SENTENCE

An operator paid to the cent of its cap shows no payment of its $487,791 increase a year later; the meal contractor billed $3.48 M against a $3 M Council-approval cap; $75.4 M of grant-funded payments are absent from the published actuals.

Alternatives recorded for each row: payment outside the extract's two commitment items or after June 30, 2025; the operative clause governs the JFS cap; the applicable purchasing threshold is not yet cited; blank rent fields may mean not entered; the request index is complete for 2022 and 2025–2026 and search-based for 2023–2024. None of these rows is a finding of intent.

NR41965641; NR41965642; NR38892373; NR34425036; NR34425022; NR71540521; NR37828979; NR55184127; NR55184143; NR55184123; OD-LEASES; MINE-OUT. Amendment PDF1,141–147; resolution PDF1–3; JFS amendment PDF1–2; PO extract rows; meal contract PDF11 and 14, invoices 1,241 and 260 (all 23 in analysis/mining/money-graph/rowe-invoices.csv); leases CSV; request index 21,072 City requests. Fraud screens that found nothing (duplicate payments) are recorded as negative results.

What the operator’s own invoices show

Eight monthly Requests for Reimbursement for the two safe sleeping sites, January–April 2026, read against the agreement’s budget rule.

Record	Finding
Dreams for Change FY2026 Requests for Reimbursement (request 26-4635), 20th & B and O Lot	Budgets $1,900,450.73 and $3,178,654.26. Through April (10 of 12 months) the operator had claimed $1,527,187 (80.4%) and $2,531,271 (79.6%): $152,719 and $253,127 a month.
Budget lines over their annual amount by April	20th & B: meals $502,800 against $441,885 (+$60,915), supplies +$11,908, potable water +$6,922. O Lot: fringe benefits $313,343 against $239,661 (+$73,683), subcontractors +$18,648, supplies +$11,050. The agreement allows line changes only through HSSD administrative review and approval; none is in the release.
Salaries against budget	20th & B salaries at 62.7% of budget with 83.3% of the year elapsed ($211,842 below pro-rata); O Lot at 70.4% ($299,798 below). Fringe runs at 21.7% and 19.2% of salaries against budgeted 17.0% and 10.3%.
Year-to-date columns that do not follow from the released invoices	The April forms carry $51,640.12 (20th & B: meals +$45,000.00, plus 10% administration) and $59,390.07 (O Lot: subcontractors +$47,656.34) more than March’s year-to-date plus April’s request: $111,030.19 of claims in no released invoice, in a release that answered a request for all January–April invoices.
Meals at 20th & B: who pays	Operator claims equal 150 persons × days × $10.00 (Jan $46,500; Feb $42,000; Mar $46,500; April’s restated $45,000 = 30 days). The City’s own meal contractor bills the O Lot by daily count (18,140 breakfasts and dinners in Sept 2025, 605 a day, at $4.61 and $5.64). The 2023 agreement has the City providing two meals a day at 20th & B; the City’s Feb 2026 meal PO (777 breakfasts and 706 dinners a day) is about a site larger than the O Lot count. Whether both cover 20th & B in FY2026 is the question for HSSD.
Operator concentration (IRS Form 990, tax year 2024)	Dreams for Change reported $5.70 M of revenue, $5.22 M (92%) government grants, up from $3.15 M a year earlier; the two City budgets total $5.08 M. Officer compensation $229,329.

IN ONE SENTENCE

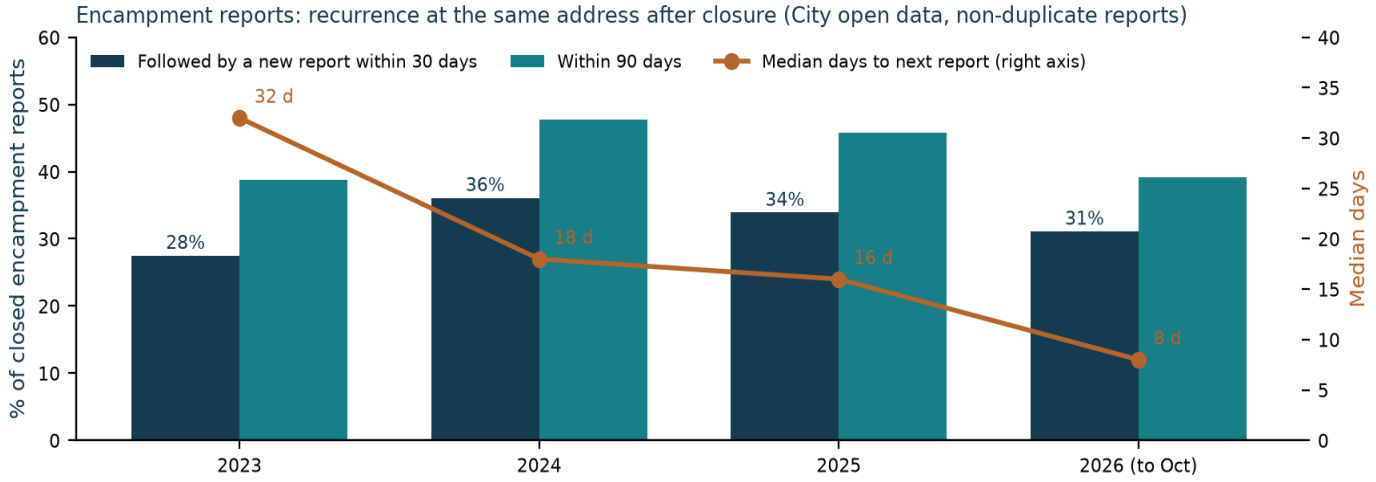

The operator’s own monthly forms show meals, fringe and supplies over their approved annual lines with two months left, salaries a fifth under budget, and $111,030 of year-to-date claims that match no invoice the City released.

The forms are the operator’s statements on the City’s template; whether HSSD approved line changes, disallowed items or paid each request is not in the release (the payment extract ends June 30, 2025). A revised prior-month form dated after April would explain the year-to-date gaps and is the first record to ask for; the FY2026 agreement and its meals budget justification are the second. Four pages were read from rendered images because their text layer is mis-encoded; their sums and month-to-month chains reconcile to the cent with the parsed pages. January’s forms were signed a week after the template’s deadline, and the Balance column changes meaning between months, so it is not used. No shelter resident is identified.

Combined release PDF1–4 and page 1 of each single form; agreement PDF16 (Section S) and scope PDF25; Rowe invoice 260 PDF1; PO extract lines for 4000278404; parser, line table and chain check in analysis/mining/dfc-rfr. Line overruns are against annual amounts, not pro-rata.

Recurrence and cost per outcome, in figures

Two measures from the City's own data: what happens at an address after an encampment report is closed, and what a permanent-housing exit costs the City at each outdoor program.

Of encampment reports closed in 2024, 36% were followed by another report at the same address within 30 days and 48% within 90 days; the median interval to the next report fell from 32 days (2023) to 8 days (2026). Duplicates flagged by the City are excluded; 2026 runs to October. Reports are complaints at an address, not counts of people.

Permanent-housing exits were 8.3% of persons served at each safe sleeping site and 23.5% at the safe parking lots; most safe-sleeping exits were subsidized placements. Operator payments only: tents, showers, laundry, restrooms, meals and security that the City buys directly add 15–25% at the safe sleeping sites. Populations differ; cost per exit is not a quality measure.
