Spending, homelessness and property accountability

- San Diego • Public evidence briefing • 12 October 2026
- A case for measurable outcomes, civilian alternatives and a property-record audit.
- Evidence supports specific scrutiny; broader causal and misconduct claims remain unproven.

Evidence brief F1–F6; source index accompanies this deck.

Start with three concrete findings

- Overtime exceeded its original adopted budget in 12 of 13 archived fiscal years.
- FY2025: 24,611 shelter referrals and 2,819 placements — events, not unique people.
- Older ESD logs contain 27 short-hold disposal entries; these are leads, not proven violations.

City exports FY2011–23; S01 PDF p.31; NR25010772; impound-log-screen.csv

$718.3 million in FY2027

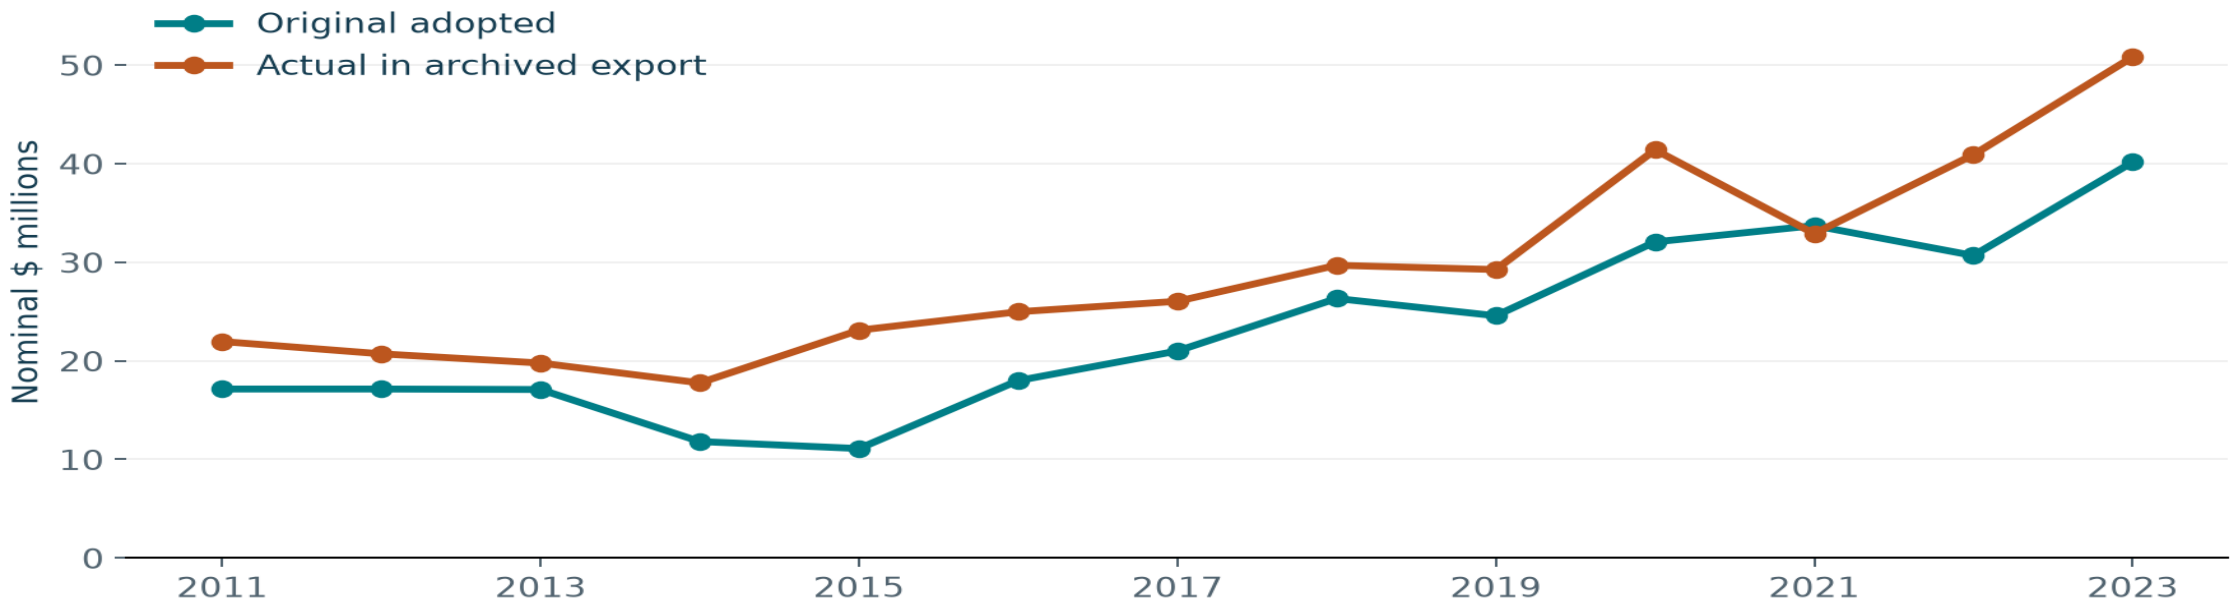

- Police General Fund adopted spending: $718,299,548.
- Increase over FY2026: $14,784,070.
- FY2025 actual exceeded original adopted spending by $18,167,337; later appropriations and reimbursements need reconciliation.

S08 PDF pp.7,10; S03 PDF p.2. General Fund, nominal dollars.

Overtime: a recurring budgeting problem

FY2023: $40.16m adopted → $50.82m actual.

+$10.66m / +26.5%; not proof of unauthorized spending.

Archived City exports; S02 PDF pp.3,6. Actuals archive marked partial; series ends FY2023.

An identifiable area for alternatives review

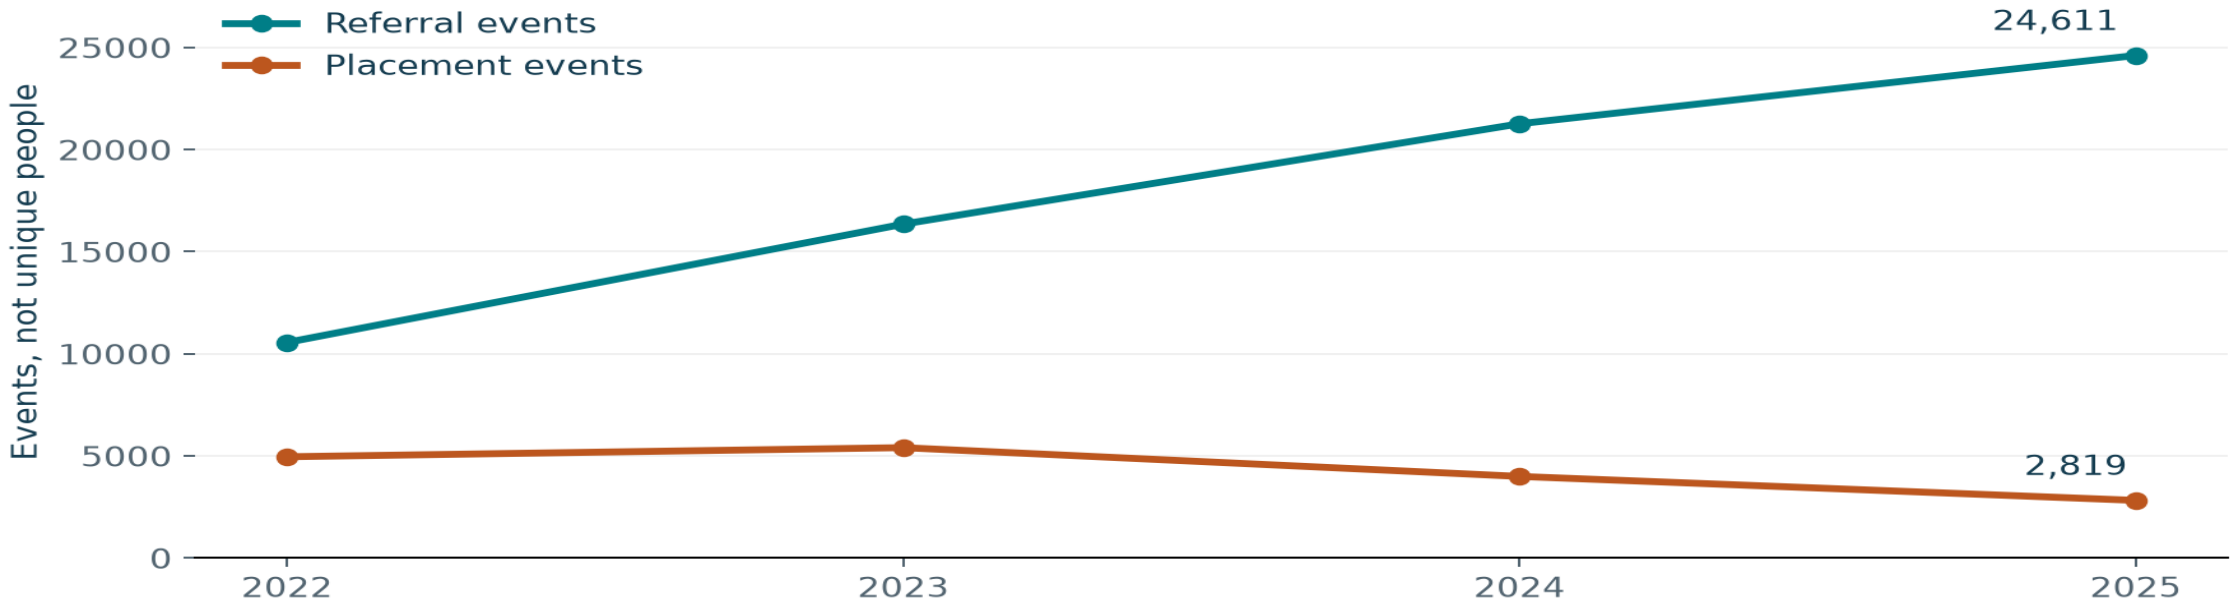

- FY2026 Neighborhood Policing: $28.65m across NPT, HOT and management.
- Designated overtime: $5.67m, already included — do not add it again.
- Clean SD police overtime: $2.39m General Fund. Price eligible civilian duties before claiming savings.

S03 PDF pp.5–7,59–61. $3.28m other designated overtime linked to Seized Assets funding.

Referrals are not a housing outcome

Placements fell from 5,403 in FY2023 to 2,819 in FY2025.

Recording changed; this is not a unique-person success rate or causal estimate.

S01 PDF p.31 / printed p.26, Exhibit 10. Counts transcribed from the audit.

Property: four cases worth an explanation

- 3356753: March 5 → May 23, 2018 • 79 days (two rows).
- 3364404: March 12 → May 23, 2018 • 72 days.
- 3367112: March 19 → May 23, 2018 • 65 days.
- 3179697: December 20, 2020 → March 4, 2021 • 74 days.

NR25010772 PDF pp.4,27. Recorded DISPOSED dates; historical rules and event evidence still needed.

Do not turn discrepancies into convictions

- Two entries contradict their “after 90 days” notes; a third has a conflicting same-case disposal date.
- Overlapping releases must not be counted as separate incidents.
- The newer log’s four dated disposals all exceed 90 days. These are ESD records, not proof of SDPD conduct.

NR25010772 pp.26–27,30; NR36242342 pp.1–2; NR36242343 p.1.

Establish who had custody — and which rule applied

- ESD abatement: notice, eligibility, documented storage and disposal.
- SDPD enforcement: separate operation and arrest-property custody.
- Join notice/photos → item decision → custody transfer → retrieval/disposal records for each event.

NR37418617 PDF pp.5–10; S12 PDF p.32. Apply the policy version effective on the event date.

Civilian response is a credible, bounded option

- County MCRT already uses clinicians, case managers and peers.
- Denver STAR research supports eligible nonviolent crisis response; it does not prove local housing outcomes.
- Fund a defined pilot; retain emergency escalation; measure completed placements, retention, safety and cost.

S14 service and dispatch FAQs; S13 PDF pp.1–3,6–7. MCRT excludes violence threats/medical emergencies.

Include the evidence that cuts the other way

- The 2026 audit found faster responses and generally favorable storage practices.
- Public-area homelessness fell; HUD-unsheltered totals include safe sleeping.
- HSSD departmental funding also rises in FY2027; Police is not proven to be the sole cause of budget stress.

S01 PDF pp.4,19,48–54; S09 PDF p.5. HSSD department is not all City homelessness spending.

Three accountable next steps

- Reconcile the named property cases with item-level records, historical rules and disposal authorization.
- Publish original/revised Police budgets, final actuals, reimbursements and task-level homelessness costs.
- Cost and evaluate civilian response for eligible work, using housing retention and safety outcomes.

Recommendations from F1–F6. No quantified safe cut or causal estimate is claimed.

The supporting documents are already public

- NextRequest 23-3164: the historical impound log.
- NextRequest 24-4229: overlapping 2022–2024 logs.
- NextRequest 24-5629: ESD procedures and notices.
- Start with the evidence brief, then the source index and incident CSV.
