UNSENT DRAFT — Property custody and disposal records

Prepared 12 October 2026. Nothing has been submitted or sent.

To the City of San Diego public records custodian: Please provide the following existing records in electronic form. This request concerns ESD impound-log entries, and does not assume that a listed action date is the actual date of destruction.

For cases 3356753, 3364404 and 3367112 (2018), 3179697 (2020–2021), 3146448 (2020–2021), 3864885 (2022–2023), 4110177 (2023) and 4311867 (2023–2024): the original item-level impound records; photographs and notices; stored-item identifiers; storage and disposal transactions; retrieval and partial-return records; disposal approvals; and record revision/audit histories. Please include records sufficient to distinguish multiple items under one case. Personal names, contact details and medical information are not needed for this analysis.

The relevant released records are NextRequest 23-3164, document 25010772, PDF pages 4, 26–27 and 30; and NextRequest 24-4229, document 36242342, pages 1–2. Case 3146448 appears with different dates/descriptions across pages 26–27. Cases 3864885 and 4110177 have dates that conflict with notes describing disposal after 90 days. Case 4311867 has the same impound and action dates. Please provide existing records documenting any corrections or explanation of those entries.

Please also provide the effective ESD impoundment/storage/disposal procedures, retention schedules, relevant Isaiah settlement provisions and amendments, and implementation instructions governing these events. Please identify the effective dates of supplied versions.

For these cases, include any ESD-to-SDPD property transfer records and corresponding SDPD custody identifiers, if they exist. Separately, please provide the current SDPD property impound/release/disposal procedures and the versions effective on any identified transfer date.

For OCA-26-07 recommendations 5.1 and 5.2, please provide existing records documenting implementation, the current excluded-item review policy, approved notice translations, and existing audit workpapers evaluating property storage, to the extent releasable. No new analysis or narrative report is requested.

UNSENT DRAFT — Police homelessness-response costs and overtime

Prepared 12 October 2026. Nothing has been submitted or sent.

To the City of San Diego public records custodian: Please provide existing electronic records for FY2024 through FY2026 showing Police overtime original adopted appropriations, revisions/transfers, final actual expenditures, reimbursement amounts billed and collected, and applicable account/internal-order descriptions. Please retain fund and fiscal-period identifiers so that General Fund and restricted funding can be distinguished.

For Neighborhood Policing, NPT, HOT and Clean SD, please provide existing budget-to-actual reports and task/assignment-level overtime records, including activity dates, paid hours, accounting codes, approval records and service descriptions. Employee names are not needed; stable de-identified position or assignment identifiers would allow analysis without publishing identities.

Please include existing records supporting the FY2026 categories of $3,276,002 Neighborhood Policing overtime and $2,390,489 Clean SD overtime in IBA Report 26-09, and any documents showing funding restrictions, reimbursements and overlap with unit totals. Include existing evaluations of civilian staffing or response alternatives and cost estimates, if maintained.

Please provide existing records used to support the FY2026 midyear projection that non-cost-recoverable overtime would be on budget, and subsequent final reconciliations, if available. This request does not ask the City to create a new cost model or characterize spending as unauthorized.

UNSENT DRAFT — Enforcement, shelter access and civilian response outcomes

Prepared 12 October 2026. Nothing has been submitted or sent.

To the appropriate City or County public records custodian: Please provide existing data dictionaries and de-identified administrative reports for FY2023 through FY2026 linking homelessness-response contacts, shelter referrals, completed placements and subsequent housing outcomes, where such linkages are maintained. Please identify whether counts refer to events, cases or unique people and any recording-method changes.

For City enforcement data, please provide available fields describing operation type, legal basis, prior progressive-enforcement encounters, shelter availability and suitability records, bed offers, acceptance/refusal, transport, citations, arrests and property-custody case identifiers. Personal names, precise home addresses, medical details and identifying narratives are not requested.

For County MCRT, please provide existing reports on eligibility/triage, calls accepted and declined, reasons for nonresponse, team capacity, response time, emergency escalation, service connections, repeat calls, adverse events and program costs. Please identify the geographic and time coverage of each report. A separate City request should seek existing referral/dispatch coordination agreements and related evaluations.

Please provide the existing abatement export released as NextRequest 26-772 document 58632019, “Copy of Abatements Completed 7.31.23 to 1.28.26.xlsx,” in an accessible electronic form. Its public download was unavailable during this investigation. No new spreadsheet or compilation is requested.
